## **Dr. Anthony Easty Inducted into Medical and Biological Engineering Elite**

WASHINGTON, D.C.— The American Institute for Medical and Biological Engineering (AIMBE) has announced the induction of Anthony C. Easty, Ph.D., Adjunct Professor, Institute of Biomaterials and Biomedical Engineering, University of Toronto to its College of Fellows. Dr. Easty was nominated, reviewed, and elected by peers and members of the College of Fellows for pioneering work in human factors, safe medication delivery, workflow practices, design and development all as they related to medical devices.

Election to the AIMBE College of Fellows is among the highest professional distinctions accorded to a medical and biological engineer. The College of Fellows is comprised of the top two percent of medical and biological engineers. College membership honors those who have made outstanding contributions to "engineering and medicine research, practice, or education" and to "the pioneering of new and developing fields of technology, making major advancements in traditional fields of medical and biological engineering, or developing/implementing innovative approaches to bioengineering education."

A formal induction ceremony was held during the AIMBE Annual Meeting at the National Academy of Sciences in Washington, DC on April 9, 2018. Dr. Easty was inducted along with 156 colleagues who make up the AIMBE College of Fellows Class of 2018.

### **About AIMBE**

AIMBE is the authoritative voice and advocate for the value of medical and biological engineering to society. AIMBE's mission is to recognize excellence, advance the public understanding, and accelerate medical and biological innovation. No other organization can bring together academic, industry, government, and scientific societies to form a highly influential community advancing medical and biological engineering. AIMBE's mission drives advocacy initiatives into action on Capitol Hill and beyond.

For more information about the AIMBE, please visit [www.aimbe.org](http://www.aimbe.org).
